

## Horizon Scanning Service

SPS produces a range of information to support managed entry of new drugs into the NHS, to assist organisations in developing medicines management policies and to inform prescribing decisions when a product has been launched.

### Our Resources

[www.sps.nhs.uk/home/planning/new-medicines/](http://www.sps.nhs.uk/home/planning/new-medicines/)

Medicines information horizon scanning specialists continually scan data sources to identify new drugs and formulations in development, and licence changes, with a focus on those that will have implications for the NHS.

### New Medicines pages

Track the development of drugs from when key trials start until they launch in the UK.

### Prescribing Outlook

Get more detail on drugs with launches planned over the next 18 months and on marketed drugs with new major indications. We also provide information on guidance from NICE and NHS England & NHS Improvement, and on other national targets that may have budgetary implications. Use it to assess the potential impact on your local health economy.

**Note:** This can only be viewed by NHS staff.

### New Medicines News

In our monthly newsletter find out about recent medicines regulatory changes and new product launches.

### And more...

Once a year, we produce a list of new product launches. And every month, we produce a list of new product evaluations published by other UK organisations.

### Can't find what you need?

If you work for the NHS we can provide detailed tailored reports. For example, if you need to know which drugs are in the pipeline for a therapeutic area.
